Well, yes.

However, PD will not have copies of the applications. We would refer them to TCEQ, because they are the lead agency.

Hope that helps,

Nick

I believe this would be just PD (RCRA), would that be correct?

Hi Shirley,

Checking to see if this request should be assign to PD.

Please let me know.

I understand that Formosa Plastics filed environmental permit applications on December 22, 2014 for a new monoethylene glycol plant and a new polyethylene plant. The units will be located at Point Comfort, Texas. I am requesting a copy of the applications for these projects.

Thank you

Shirley Langley
